

Is there one place on earth that we can free ourselves from the cell phone. As a Flight Attendant it is hard enough to get people to pay attention during the emergency demonstration. In-flight should be a cell phone free zone. People are rude, obnoxious and loose all sense of manners when it comes to them and their phone. It is hard enough just to get them to wait until 10,000 feet to turn on their other electronic devices. Many times it is hard for them to turn them off while preparing for landing. For Safety sake and the sake of irritating other passengers when they are trying to rest PLEASE DO NOT ALLOW PHONES IN FLIGHT.
